

Fifty mFRR EAM Recurring Meeting – Statnett, Svenska Kraftnät and Fifty, technical view

12.10.2021

Visit nordicbalancingmodel.net

Clarifications on bid submission

- A strict validation against the Gate closure time (GCT) is implemented
 - a bid message will be rejected if it contains at least one bid which has passed its GCT.
- Messages containing at least one faulty bid will be rejected as a whole
- In bid updates before GCT, only the updates should be sent in and not the entire bid series

News on BSP Test

- Test environment will open in November
