

Fifty mFRR EAM Recurring Meeting

Statnett, Svenska Kraftnät and Fifty

- technical view

20.09.2022

Visit nordicbalancingmodel.net

Agenda

- Transition phase – supported bid attributes
- Transition phase – activation ordering
 - Bid activation
 - Production adjustment ("Produksjonsflytting"/"Kvartsaffär")
 - Production smoothing ("Produksjonsglatting")

Open Q&A

Statnett

Transition phase –fully supported bid attributes

During transition and until Go-live, the following bid types will be fully supported:

- Simple bids – fully divisible
- Technical linked bids – with same price, direction and resource
- Maximum duration and resting time
- All bids will be available for both direct and scheduled activation

Transition phase – fully supported bid attributes

The following bid attributes are **fully supported** from start of transition:

- Simple bids – fully divisible
- Technically linked bids – with same price, direction and resource
- Maximum duration and resting time
- Activation time (information to TSO operator)

Transition phase – unsupported bid attributes

The following bid attributes **can be used** from start of transition. But until Go-live mFRR EAM these attributes will not be seen by the TSO operator and will therefore not affect the bid selection:

- MarketProductType "Scheduled activation only" (A05)
- MarketProductType "Scheduled and direct activation" (A07)
- Minimum offered volume
- Indivisible bids
- Conditionally available bids
- Period shift

The following bid attributes **cannot be used** before Go-live mFRR EAM:

- MarketProductType "Non-standard product " (A02)
- MarketProductType "Stand-alone period shift" (Z01)
- Complex bids: Exclusive group
- Complex bids: Multipart
- Complex bids: Inclusive bids
- Conditionally unavailable bids

Transition phase –activation ordering
